## **Tattoo Removal**

I offer saline tattoo removal which works by drawing unwanted pigment to the surface of the skin, using my machine and Li-ft solution which is a high potency salt based saline with fruit seed extracts. This is an effective form of removal which removes all colours, some laser tattoo removal cannot do this. I can remove cosmetic tattooing as well as small body tattoos. A consultation is advised first to assess the area and give an estimation of sessions required and costs. This service cannot be booked online as I need to know how much time to allow so please book a consultation first
